

# INTERSTELLAR PLASTICS

Leading manufacturer  
of high-quality **plastic  
bottles & closures.**

Pharmaceuticals

Chemicals

FMCG

Company Profile  
2024

## We are FSSC approved and in the process of adopting more international standards

We are a leading manufacturer of high-quality plastic bottles and closures. With a commitment to sustainability and innovation, we produce a wide range of plastic bottles, closures and other custom applications. Our products are widely used across various industries, such as food, pharmaceuticals, fast moving consumer goods and chemicals.

Founded in 2016, we have grown to become a trusted name in Plastic product manufacturing, recognised for our technical expertise, cutting-edge manufacturing processes, and eco-friendly approach. We are proud to serve both national and international markets, providing sustainable and durable solutions that meet the needs of modern businesses and consumers alike.

**Our team has over 40 years of experience in plastic bottle manufacturing, our focus is on delivering the best quality and supply consistency.**

### BEE

As a level 1 BEE company we are a creator of sustainable value adding jobs and services for the South Africa economy. Being a SME with strong capabilities we are able to fill a unique gap in the procurement of packaging for many major products.

### Quality

We are committed to producing products that meet the highest industry standards for durability, safety, and performance

### Vision

To be the best in time and quality cost.

### Mission, Goal & Objective

To provide customers with:

- Ultimate Quality
- Ultimate Consistency
- Lowest Tolerance
- Best Productivity
- Best Service Delivery
- Best Value

## Our core services is manufacturing of plastic bottles and closures

We leverage state-of-the-art manufacturing technology to ensure precision, consistency, and efficiency in every product we create. Our team of experienced engineers and technicians is dedicated to finding innovative solutions to meet the demands of a rapidly changing market.

# Manufacturing

We are committed to producing plastic products that meet the highest industry standards for durability, safety, and performance.

We convert a wide range of polymers, including HDPE, LDPE, PP, and PET.

### Injection Moulding

The most commonly used process for manufacturing plastic products. From bottle closures to car bumpers are manufactured using this process. The multitude of applications and high quality levels allow for this to be the favoured plastic production process.

### Extrusion Blow Moulding

The largest process user of High Density Polyethylene (HDPE). With products including bottles, large holding tanks and automotive fuel tanks.

### Injection stretch blow moulding

Used for manufacturing high quality high clarity plastic bottles. This is the main process used for beverage bottles.

### Compression moulding

Heat and pressure are applied to shape the material into the desired part. This method is widely used for creating strong, durable components, especially for larger, intricate parts.

### Blow Moulding

This is the highest quality process for producing blow mould HDPE and PP bottles.

### Decorating

Screen Printing and Labelling

We are also able to manufacture using 100% post consumer recycled and biodegradable materials

## We offer the following additional services

Labelling

Contract filling

Prototypes and Designing of new packages

Manufacturing of moulds and dies

Printing
